

A 3D microscopic illustration of various rod-shaped bacteria. Some are floating in the air, while others are resting on a rough, textured surface that resembles a biological or synthetic material. The entire scene is rendered in shades of green and black, with a perspective view from the bottom left corner.

HELP STOP THE SPREAD OF ANTIBIOTIC RESISTANCE

Antibiotic resistance occurs when certain bacteria no longer respond to antibiotics that were able to stop or destroy them before.

You can help prevent these miracle medicines from losing their effectiveness by reducing the spread of infection, using antibiotics wisely, and ensuring proper waste disposal.
