

Answer key, quiz part 4

Q1: What statement is correct?

C. Antibiotic resistance is a global problem that in different ways affects people around the world.

Q2. What is the Global Action Plan on Antimicrobial Resistance?

A. A plan, adopted by the World Health Assembly in 2015, containing strategic objectives that indicate what the world should focus on to ensure access and availability to effective antimicrobials for as long as possible.

Q3. Please describe which alternative below that lists three actions individuals can take to help slow down the spread and emergence of antibiotic resistant bacteria.

C. Get vaccinated, cook meat thoroughly and do not use antibiotics unnecessarily.

Q4. Countries are encouraged by the WHO to set up national action plans on ABR. What focus areas should such plans ideally include?

C. All of the above.
